

RetailMeNot Shoppers Trend Report: Coupons on Consumers' Mobile Devices Increase Likelihood of In-Store Purchases

- In the survey, conducted April 2013, nearly 8 in 10 consumers (78%) polled had used their mobile devices to do some sort of research online in the past month

- More than half (54%) of consumers polled bought something using their mobile device in the previous month

- More than half (51%) said they would be more likely to buy something in-store if they received a coupon on their mobile device for that store while nearby

AUSTIN, Texas, June 21, 2013 /PRNewswire/ -- RetailMeNot.com (www.retailmenot.com), the largest digital coupon website in the United States, released the results of a mobile commerce survey conducted jointly in April 2013 with The Omnibus Company.

The survey results, which reviewed current mobile commerce behaviors by consumers, were recently delivered during a presentation by RetailMeNot at the Internet Retailer Conference & Exhibition in Chicago, IL, on June 7.

As an overview, the survey revealed that the vast majority of consumers surveyed have moved beyond making simple phone calls and sending text messages via their mobile device to having it become their personal research tool. In fact, almost 8 in 10 respondents reported using their mobile devices to do some sort of research online in the most recent month. More than half of consumers surveyed (54%) used their mobile device while buying something in the month prior to taking the survey in April 2013.

Deal-Seeking Behaviors

Deal-seeking behaviors have become the norm within the purchase cycle. One-third (33%) of consumers surveyed have conducted searches on a mobile device for coupons online, while over a quarter (26%) bought something in a physical store using a coupon found on a mobile device. Of those consumers who made purchases in-store using a digital coupon, 90% had done so in the last month.

Furthermore, relevant offers seemed to further incentivize consumers to buy. Over half of respondents (51%) indicated that they are more likely to enter a store and buy something if they receive a coupon on their mobile device while near that store. If the consumer received a coupon on their mobile device while already inside the store, more than 6 in 10 consumers (63%) indicated that they would be more likely to buy something.

"There's no doubt that today's consumers are more empowered than ever by smartphone technology, and retailers can recognize and enable those behaviors or lose business to competitors who understand the power of mobile marketing," says John Faith, senior vice president of external affairs for RetailMeNot, Inc.

Other stats of note from those surveyed include:

- 44% of 18- to 34-year-olds vs. 26% of respondents 35+ have searched for a coupon on the Internet with a mobile device. 39% percent of 18- to 34-year-olds (vs. 18% of older consumers) have actually bought something in a physical store with a coupon they found on a mobile device.
- More parents than non-parents report that they have searched for a coupon on the Internet with a mobile device (45% vs. 27%) and bought something in a physical store with a coupon they found on a mobile device (37% vs. 21%).
- Consumers who reported using their mobile device to search for something online in the past month:
 - 94% of 18- to 34-year-olds vs. 65% of those who are 35+
 - 89% of parents vs. 71% of non-parents
- Those who reported using their mobile device to buy something online in the past month:
 - 61% of men vs. 48% of women
 - 71% of 18- to 34-year-olds vs. 42% of those who are 35+
 - 67% of parents vs. 46% of non-parents
- Consumers more likely to search for coupons on their mobile devices while in physical stores include:
 - 46% of 18- to 34-year-olds vs. 30% of those who are 35+
 - 46% of parents vs. 31% of non-parents
 - 42% who are located in the Southern states vs. 34% in other regions

- Those more likely to buy something if they received a coupon for a store on their mobile device while nearby include:
 - 63% of 18- to 34-year-olds vs. 43% of those who are 35+
 - 64% of parents vs. 44% of non-parents
 - 56% who are located in the Southern states vs. 49% of consumers in other regions

Survey Methodology:

The Mobile Shopping Survey was conducted by The Omnibus Company between April 12 and April 17, 2013, among 1,067 U.S. residents ages 18 and over, using an email invitation and an online survey. Quotas are set to ensure reliable and accurate representation of the entire U.S. population 18 and over. Results of any sample are subject to sampling variation. The magnitude of the variation is measurable and is affected by the number of interviews and the level of the percentages expressing the results. In this particular study, the chances are 95 in 100 that a survey result does not vary, plus or minus, by more than 3 percentage points from the result that would be obtained if interviews had been conducted with all persons in the universe represented by the sample. The margin of error for any subgroups will be slightly higher.

About RetailMeNot.com

RetailMeNot.com (www.retailmenot.com) is the most widely used digital coupon site in the United States. Our mission is to help consumers save money and enjoy a hassle-free discount shopping experience. Since November 2006, our users have shared hundreds of thousands of digital coupons from retailers.
