In addition to this release, the company has also provided a prepared remarks document, each of which is available on the Investor Relations section of our website.

Third Quarter Financial Results Highlights and Key Operating Metrics

(All comparisons are made to the third quarter of 2015 unless otherwise noted. Amounts may not compute due to rounding.

With the acquisition of GiftCard Zen completed in the second quarter of 2016, RetailMeNot, Inc. is providing financial and operating results for subsequent periods in two separate operating segments, with one representing the "core" RetailMeNot business and the other representing the "gift card" business.

For our core segment, in addition to total net revenues, we are providing segment operating income, or SOI, results and guidance, as we believe this to be an important financial metric to evaluate the operating performance of this business. SOI is defined as operating income of the core business segment plus depreciation, amortization of intangible assets, stock-based compensation expense, third-party acquisition-related costs and other operating expenses (including non-cash impairments and compensation arrangements entered into in connection with acquisitions).

For our gift card segment we are providing net revenue and gross profit results and guidance, as we believe these to be important financial metrics to evaluate the operating performance of this business. We define gift card segment net revenues as the gross market value of the gift cards sold, net of returns. Gross profit represents the difference between net revenues less the cost of the gift card sold, including adjustments for shipping and chargebacks.

We are also providing results and guidance combining the results of both segments on a consolidated basis.

• Core Segment

- Total net revenues \$50.5 million, down 4%.
 - In-store & advertising net revenues were up 28%, representing 30% of total net revenues.

 - Desktop online transaction net revenues declined 17%, representing 59% of total net revenues.
- Segment operating income was \$10.4 million, representing SOI margins of 21%.

Key Operating Metrics

<u>Visits</u>. RetailMeNot defines a visit as a group of interactions that take place on one of RetailMeNot Inc.'s websites from computers, smartphones, tablets or other mobile devices within a given time frame as measured by Google Analytics, a product that provides digital marketing intelligence. A single visit can contain multiple page views, events, social interactions and ecommerce transactions. A single visitor can open multiple visits. Visits can occur on the same day, or over several days, weeks or months. As soon as one visit ends, there is then an opportunity to start a new visit. A visit ends either through the passage of time or a campaign change, with a campaign generally meaning arrival via search engine, referring site or campaign-tagged information. A visit ends through passage of time either after 30 minutes of inactivity or at midnight Pacific Time. A visit ends through a campaign change if a visitor arrives via one campaign or source, leaves the site, and then returns via another campaign or source. Visits for the period do not include interactions through our mobile applications or interactions with giftcardzen.com.

Mobile Unique Visitors. This amount represents the average number of mobile unique visitors per month for the three month period ended September 30, 2016. RetailMeNot counts each of the following as a mobile unique visitor: (i) the first time a specific mobile device accesses one of our mobile applications during a calendar month, and (ii) the first time a specific mobile device accesses one of our mobile websites using a specific web browser during a calendar month. If a mobile device accesses more than one of our mobile websites or mobile applications in a single calendar month, the first access to each such mobile website or mobile application is counted as a mobile unique visitor as they are tracked separately for each mobile domain. We measure mobile unique visitors with a combination of internal data sources and Google Analytics data.

Use of Non-GAAP Financial Measures

To provide investors with additional information regarding our financial results, this document includes references to adjusted EBITDA, non-GAAP net income (loss) and non-GAAP net income (loss) per share, each of which is a non-GAAP financial measure. For a reconciliation of these non-GAAP financial measures to the most directly comparable GAAP financial measures, see the tables provided below in this release.

RetailMeNot has not reconciled adjusted EBITDA guidance to net income (loss) guidance because we do not provide guidance for third party acquisition-related costs or other operating expense, net interest income/expense, other non-operating income and expenses and income taxes, net of any foreign exchange income or expense. As these items cannot be reasonably predicted at this time, we are unable to provide such guidance. Accordingly a reconciliation to net income (loss) guidance is not available without unreasonable effort.

RetailMeNot defines adjusted EBITDA as net income (loss) plus depreciation, amortization of intangible assets, stock-based compensation expense, third-party acquisition-related costs, other operating expenses (including non-cash impairments and compensation arrangements entered into in connection with acquisitions), net interest expense, other non-operating income or expense (including net foreign exchange gains and losses) and income taxes.

RetailMeNot discloses adjusted EBITDA on a consolidated basis because it is a key measure used by RetailMeNot and its

board of directors to understand and evaluate RetailMeNot's financial and operating performance, establish budgets and operational goals and as an element in determining compensation of certain of its executives. RetailMeNot believes adjusted EBITDA facilitates period-to-period comparisons of operations that could otherwise be masked by the effect of the expenses that RetailMeNot excludes in this non-GAAP financial measure and facilitates comparisons with other peer companies, many of which use similar non-GAAP financial measures to supplement their GAAP results.

RetailMeNot's presentation of non-GAAP net income (loss) and non-GAAP net income (loss) per share excludes the impact of amortization of purchased intangible assets, stock-based compensation expense, third party acquisition-related costs, other non-cash operating expenses (including non-cash impairments and compensation arrangements entered into in connection with acquisitions) and income taxes, net of the tax effect of the adjustments above. These measures are not key metrics used by RetailMeNot or its board of directors to measure financial or operating performance or otherwise manage the business. However, RetailMeNot provides non-GAAP net income (loss) and non-GAAP net income (loss) per share as supplemental information for investors, as they facilitate period-to-period comparisons of operations that could otherwise be masked by the effect of the expenses that RetailMeNot excludes in these non-GAAP financial measures and facilitates comparisons with other peer companies, many of which use similar non-GAAP financial measures to supplement their GAAP results.

Adjusted EBITDA, non-GAAP net income (loss) and non-GAAP net income (loss) per share have limitations as analytical tools, and you should not consider these measures in isolation or as substitutes for analysis of RetailMeNot's results as reported under GAAP. Because of these limitations, you should consider adjusted EBITDA, non-GAAP net income (loss) and non-GAAP net income (loss) per share alongside other financial performance measures, including various cash flow metrics, operating income (loss), net income (loss) and RetailMeNot's other GAAP results.
